-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7, 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Huynh (5,491,766).

Huynh's device discloses an optical fiber holder (figs. 1-7) comprising: a tubular member (46) for fitting over an optical fiber bundle comprising a bundle of plurality optical fibers (see fig. 2) to prevent the optical fibers from separating from each other and a pressing structure with clamping member (see abstract) for exerting a pressing force on the optical fiber bundle in a direction perpendicular to a longitudinal direction of the optical fiber bundle to press the optical fiber bundle against an inner periphery of the tubular member; the pressing structure being placed inwardly of the outer periphery of the tubular member (see fig. 6) and spaced a predetermined distance apart from a leading edge of the optical bundle in longitudinal direction (see fig. 2) with a semi-cylindrical member (45, 43) having the set screw.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Huynh (5,491,766) in view of Dey et al (US patent 4,372,792).

Huynh's device discloses the aforementioned limitations, but fails to place the injection features using the aperture in the tubular member. Dey's device discloses the injection features using the aperture in the tubular member (see abstract). It would have been obvious to one having ordinary skill in the art at the time the invention was made to add the aperture in the tubular member for material injection such as the one disclosed in Dey's device in order to improve the compressing features in Huynh's device.
